Omaha, Nebraska · tbaily24@hotmail.com · (402) 957-5167 · linkedin.com/in/trevor-baily24

Omaha-based senior engineer. I use AI tooling so I can take on more of the work myself, and I help the team move faster without cutting corners.

---

## SKILLS

---

**Frontend:** React 19, Next.js App Router, TypeScript, Vite, Tailwind, Design systems

**Backend:** .NET BFFs, Java / Kotlin / Spring Boot, Elasticsearch, OpenAPI contracts, Stored proc to API migrations

**Quality:** Vitest / Jest, Playwright, Coverage gates, Static analysis

**Platform:** Kubernetes ingress, NGINX, Cloudflare, AWS, GitHub Actions, Octopus Deploy, Dynatrace / structured logs

**AI-assisted engineering:** Cloud Agent Automations, Cursor skills/rules, MCP, Agent workflows/loops, Knowledge graphs/tag libraries

**Product:** Search and discovery, A/B experiments, Feature flags, Marketplace UX

## EXPERIENCE

---

**Auction Technology Group (ATG) — Omaha, NE (remote)**

**Senior Software Development Engineer**

Oct 2024 - Present

**Software Development Engineer**

May 2022 - Oct 2024

- I work across a lot of the stack: React/Next.js, .NET BFFs, Java/Spring, Kubernetes. I own the path from the UI through the BFF and search services to production.
- I push for agentic development on the team: Cursor skills, MCP, and agent workflows people can reuse, plus cloud agent environments against the company codebase.
- On a large legacy consolidation, I helped rewrite Classic ASP into a Next.js frontend and .NET BFF using Cursor, and I stay close to stakeholders on it.
- Earlier as SDE: performance testing and legacy maintenance; shipped the payments system against existing internal services; kept Spring Boot microservices and Classic ASP/Java monoliths running; contributed to a shared component library now used in the Next.js/TypeScript UI.

**Priority Technologies LLC**

**Senior Frontend Developer**

Jul 2017 - May 2022

- Modernized the frontend of a large enterprise monolith (1.5M+ LOC) with Vue.js, Vuetify, Tailwind, and Pinia. Clearer UX, and the pages actually loaded faster.
- Was the sole frontend engineer who took a state-based product from idea to production in under six months, including requirements and design.
- Led a Struts 1 to Struts 2 migration as both PM and developer with thin knowledge transfer, and rolled it out to all clients on time and under budget.
- Moved dependency management from manual ANT builds to Maven, including security reviews and library upgrades.
- Built the consumer-facing web presence that helped grow exposure and support acquisition of the product, and added JasperSoft / HighCharts for embedded reporting.

## EDUCATION

---

**University of Nebraska-Lincoln**

2012 - 2016

Bachelor of Business Administration (B.B.A.), Finance
