Lead-ready AI-native engineer focused on agentic development and production migrations. Ships Cursor-driven full-stack rewrites, cloud agent environments, and reusable skills and rules. Runs multi-agent systems in daily production use. Based in Omaha.

SKILLS

- Frontend:** React 19, Next.js App Router, TypeScript, Vite, Tailwind, Design systems
- Backend:** .NET BFFs, Java / Kotlin / Spring Boot, Elasticsearch, OpenAPI contracts, Stored proc to API migrations
- Quality:** Vitest / Jest, Playwright, Coverage gates, Static analysis
- Platform:** Kubernetes ingress, NGINX, Cloudflare, AWS, GitHub Actions, Octopus Deploy, Dynatrace / structured logs
- AI-assisted engineering:** Cloud Agent Automations, Cursor skills/rules, MCP, Agent workflows/loops, Knowledge graphs/tag libraries
- Product:** Search and discovery, A/B experiments, Feature flags, Marketplace UX

EXPERIENCE

Auction Technology Group (ATG) — Omaha, NE (remote)

- Senior Software Development Engineer**
- Oct 2024 - Present
- Software Development Engineer**
- May 2022 - Oct 2024

- Migrated Classic ASP frontend to Next.js App Router with .NET BFF using Cursor agents. OpenAPI contracts, behavior parity testing, and regular stakeholder sync throughout.
- Built cloud agent environments for company repos. Created reusable Cursor skills and rules the team can adopt. I run multi-agent systems in production for personal tooling and have shipped Cloudflare AI workers.
- Own search and discovery: React/Next.js UI, .NET BFF, Java/Spring search services, and Elasticsearch on Kubernetes. App Router migrations with full behavior parity.
- Quality systems for AI-assisted development. Vitest-first testing, strategic Playwright coverage, enforced minimum coverage gates.
- Earlier as SDE: shipped the payments system ahead of schedule. Maintained Spring Boot microservices and legacy Java/ASP. Contributed components to the modern TypeScript UI library.

Priority Technologies LLC

- Senior Frontend Developer**
- Jul 2017 - May 2022

- Modernized the frontend of an enterprise monolith (1.5M+ LOC) with Vue.js, Vuetify, Tailwind, and Pinia. Clearer UX, and the pages actually loaded faster.
- Sole frontend engineer on a state-based product from requirements to production in under six months.
- Led Struts 1 to Struts 2 migration as both PM and lead developer with thin knowledge transfer. Rolled out to all clients on time and under budget.
- Moved dependency management from manual ANT builds to Maven, including security reviews and library upgrades.
- Built the consumer-facing web presence that helped grow exposure and support acquisition. Integrated JasperSoft and HighCharts for embedded reporting.

EDUCATION

- University of Nebraska-Lincoln**
- 2012 - 2016
- Bachelor of Business Administration (B.B.A.), Finance
