AI-first senior engineer who ships with agents by default — Cursor migrations, cloud agent environments, skills and rules teams reuse. I run personal multi-agent systems daily. Omaha.

SKILLS

Frontend: React 19, Next.js App Router, TypeScript, Vite, Tailwind, Design systems
Backend: .NET BFFs, Java / Kotlin / Spring Boot, Elasticsearch, OpenAPI contracts, Stored proc to API migrations
Quality: Vitest / Jest, Playwright, Coverage gates, Static analysis
Platform: Kubernetes ingress, NGINX, Cloudflare, AWS, GitHub Actions, Octopus Deploy, Dynatrace / structured logs
AI-assisted engineering: Cloud Agent Automations, Cursor skills/rules, MCP, Agent workflows/loops, Knowledge graphs/tag libraries
Product: Search and discovery, A/B experiments, Feature flags, Marketplace UX

EXPERIENCE

Auction Technology Group (ATG) — Omaha, NE (remote)
Senior Software Development Engineer Oct 2024 - Present
Software Development Engineer May 2022 - Oct 2024

- Used Cursor to rewrite a Classic ASP frontend into Next.js App Router plus .NET BFF — full production system, not a demo. Contract-first OpenAPI, behavior parity migrations, stakeholder checkpoints.
- Stood up cloud agent environments against company repos early. Built Cursor skills and rules the team reuses. Run personal multi-agent systems daily for life ops. Ship AI workers on Cloudflare.
- Own search and discovery stack: React/Next.js UI → .NET BFF → Java/Spring search services → Elasticsearch on Kubernetes. App Router migrations with full behavior parity.
- Quality: Vitest-first, Playwright where it matters, coverage gates enforce minimums. Agents move fast, quality stays up.
- Earlier as SDE: shipped payments system ahead of schedule against internal services. Spring Boot microservices, legacy Java/ASP maintenance. Contributed shared components into the modern TypeScript UI.

Priority Technologies LLC
Senior Frontend Developer Jul 2017 - May 2022

- Modernized frontend of a large enterprise monolith (1.5M+ LOC) with Vue.js, Vuetify, Tailwind, Pinia. Clearer UX, faster page loads.
- Sole frontend engineer — shipped a state-based product from idea to production in under six months, including requirements and design.
- Led Struts 1 → Struts 2 migration as PM and developer with thin knowledge transfer. Rolled out to all clients on time, under budget.
- Moved dependency management from manual ANT builds to Maven. Security reviews, library upgrades.
- Built consumer-facing web presence that helped grow exposure and support acquisition. Added JasperSoft / HighCharts for embedded reporting.

EDUCATION

University of Nebraska-Lincoln 2012 - 2016
Bachelor of Business Administration (B.B.A.), Finance
