

Trevor Baily

Omaha, Nebraska · tbaily24@hotmail.com · (402) 957-5167 · linkedin.com/in/trevor-baily24 · trevormbaily.github.io/resume

AI-native engineer shipping agentic development and production migrations. Cursor-driven full-stack rewrites, cloud agent environments, reusable skills and rules teammates use in production. Runs Grok Bot and multi-agent systems in production. Based in Omaha.

SKILLS

Frontend: React 19, Next.js App Router, TypeScript, Vite, Tailwind, Design systems

Backend: .NET BFFs, Java / Kotlin / Spring Boot, Elasticsearch, OpenAPI contracts, Stored proc to API migrations

Quality: Vitest / Jest, Playwright, Coverage gates, Static analysis

Platform: Kubernetes ingress, NGINX, Cloudflare, AWS, GitHub Actions, Octopus Deploy, Dynatrace / structured logs

AI-assisted engineering / Personal agents: Cloud Agent Automations, Cursor skills/rules, MCP, Agent workflows/loops, Grok Bot / daily life agents, Knowledge graphs/tag libraries

Product: Search and discovery, A/B experiments, Feature flags, Marketplace UX

EXPERIENCE

Auction Technology Group (ATG) · Omaha, NE (remote)

Senior Software Development Engineer Oct 2024 - Present

Software Development Engineer May 2022 - Oct 2024

- Migrated user-facing Classic ASP frontend (legacy monolith) to Next.js App Router + .NET BFF end-to-end using Cursor agents. Problem: brittle ASP with no contracts. Approach: OpenAPI-first contracts, behavior parity test suite, stakeholder sync cadence. Result: shipped migration with full parity and cleaner maintainability.
- Built cloud agent environments and reusable Cursor skills/rules for company repos. Teammates now use these skills and rules in their agent workflows across the organization.
- Run Grok Bot in production (multi-agent system proving agentic patterns in real-world use). Shipped Cloudflare AI workers.
- Own search and discovery: React/Next.js UI, .NET BFF, Java/Spring search services, Elasticsearch on Kubernetes. App Router migrations with behavior parity.
- Quality systems for AI-assisted development. Vitest-first testing, strategic Playwright coverage, minimum coverage gates.
- Earlier as SDE: shipped payments system ahead of schedule. Maintained Spring Boot microservices and legacy Java/ASP. Contributed components to TypeScript UI library.

Priority Technologies LLC

Senior Frontend Developer Jul 2017 - May 2022

- Modernized the frontend of an enterprise monolith (1.5M+ LOC) with Vue.js, Vuetify, Tailwind, and Pinia. Clearer UX, and the pages actually loaded faster.
- Sole frontend engineer on a state-based product from requirements to production in under six months.
- Led Struts 1 to Struts 2 migration as both PM and lead developer with thin knowledge transfer. Rolled out to all clients on time and under budget.
- Moved dependency management from manual ANT builds to Maven, including security reviews and library upgrades.
- Built the consumer-facing web presence that helped grow exposure and support acquisition. Integrated JasperSoft and HighCharts for embedded reporting.

EDUCATION

University of Nebraska-Lincoln 2012 - 2016

Bachelor of Business Administration (B.B.A.), Finance
