Lead-ready AI-native engineer specializing in agentic development and production migrations. Ships Cursor-driven full-stack rewrites, cloud agent environments, and reusable skills/rules; operates multi-agent systems in daily production use. Omaha.

SKILLS

Frontend: React 19, Next.js App Router, TypeScript, Vite, Tailwind, Design systems
Backend: .NET BFFs, Java / Kotlin / Spring Boot, Elasticsearch, OpenAPI contracts, Stored proc to API migrations
Quality: Vitest / Jest, Playwright, Coverage gates, Static analysis
Platform: Kubernetes ingress, NGINX, Cloudflare, AWS, GitHub Actions, Octopus Deploy, Dynatrace / structured logs
AI-assisted engineering: Cloud Agent Automations, Cursor skills/rules, MCP, Agent workflows/loops, Knowledge graphs/tag libraries
Product: Search and discovery, A/B experiments, Feature flags, Marketplace UX

EXPERIENCE

Auction Technology Group (ATG) — Omaha, NE (remote)
Senior Software Development Engineer Oct 2024 - Present
Software Development Engineer May 2022 - Oct 2024

- Led production migration of Classic ASP frontend to Next.js App Router with .NET BFF using Cursor agent workflows. Delivered contract-first OpenAPI specifications, behavior parity validation, and stakeholder alignment throughout migration.
- Established cloud agent development environments against company repositories and built reusable Cursor skills and rules enabling team-wide adoption. Operate multi-agent systems in production for personal tooling; deployed Cloudflare AI workers demonstrating end-to-end agentic capabilities.
- Own search and discovery platform spanning React/Next.js UI, .NET BFF, Java/Spring search services, and Elasticsearch on Kubernetes. Drove App Router migrations maintaining complete behavior parity.
- Implemented quality systems supporting high-velocity agent-assisted development: Vitest-first testing strategy, strategic Playwright coverage, and enforced minimum coverage gates.
- As SDE: delivered payments system ahead of schedule against internal services. Maintained Spring Boot microservices and legacy Java/ASP systems; contributed shared components to modern TypeScript UI library.

Priority Technologies LLC
Senior Frontend Developer Jul 2017 - May 2022

- Modernized frontend architecture of enterprise monolith (1.5M+ LOC) with Vue.js, Vuetify, Tailwind, and Pinia. Delivered improved UX and measurably faster page loads.
- Independently owned frontend engineering for state-based product launch: gathered requirements, designed interfaces, and shipped production release in under six months.
- Led Struts 1 → Struts 2 migration serving as both PM and lead developer with minimal knowledge transfer. Completed rollout to all clients on schedule and under budget.
- Migrated dependency management from manual ANT builds to Maven. Conducted security reviews and coordinated library upgrades across the platform.
- Built consumer-facing web presence supporting business growth and customer acquisition. Integrated JasperSoft and HighCharts for embedded reporting capabilities.

EDUCATION

University of Nebraska-Lincoln 2012 - 2016
Bachelor of Business Administration (B.B.A.), Finance
