Senior engineer in Omaha. I use agents to spec, plan, and execute multi-step work on a real codebase, own the tests and what ships, and turn that loop into Cursor skills, rules, and cloud environments other engineers can run.

SKILLS

Frontend: React 19, Next.js App Router, TypeScript, Vite, Tailwind, Design systems
Backend: .NET / C# BFFs, Java / Kotlin / Spring Boot, Elasticsearch, OpenAPI contracts, Stored proc to API migrations
Quality: Vitest / Jest, Playwright, Coverage gates, Contract tests, Static analysis
Platform: Kubernetes ingress, NGINX, Cloudflare, AWS, GitHub Actions, Octopus Deploy, Dynatrace / structured logs
Agentic engineering: Spec-to-ship agent loops, Cloud agent environments, Cursor skills/rules, MCP, Multi-agent systems, Team coaching
Product: Search and discovery, A/B experiments, Feature flags, Marketplace UX

EXPERIENCE

Auction Technology Group (ATG) — Omaha, NE (remote)
Senior Software Development Engineer Oct 2024 - Present
Software Development Engineer May 2022 - Oct 2024

- Helped lead a Classic ASP rewrite to Next.js + .NET BFF in Cursor. Agents did the multi-step work across the repo; I owned spec, tests, and what shipped. Packed the loop into skills, rules, and cloud agent environments teammates run on the company codebase.
- Own marketplace search and discovery end to end: React/Next.js UI → .NET BFF → Java/Spring search → Kubernetes/Octopus production. App Router migrations with behavior parity, design-system tokens, and URL-as-state.
- Keep the quality bar when agents write code: contract tests in CI, Vitest first, Playwright for browser/BFF, coverage gates on the migration.
- Earlier as SDE: payments integration ahead of schedule; Spring Boot microservices and legacy Java/ASP; shared components adopted in the modern TypeScript UI.

Priority Technologies LLC
Senior Frontend Developer Jul 2017 - May 2022

- Modernized frontend of 1.5M+ LOC enterprise monolith with Vue.js, Vuetify, Tailwind, and Pinia. Clearer UX and measurably faster page loads.
- As sole frontend engineer, shipped a state-based product from idea to production in under six months, including requirements and design.
- Led Struts 1 to Struts 2 migration as PM and developer with minimal knowledge transfer; rolled out to all clients on time and under budget.
- Migrated dependency management from manual ANT builds to Maven, including security reviews and library upgrades.
- Built consumer-facing web presence supporting product acquisition; integrated JasperSoft and HighCharts for embedded reporting.

EDUCATION

University of Nebraska-Lincoln 2012 - 2016
Bachelor of Business Administration (B.B.A.), Finance
